

Adopt-a-Classroom

The volume of a teacher's normal speaking voice is approximately 65 db while the noise of a chair scraping on an uncarpeted floor is 85 db.

It has been shown that a reduction of classroom noise increases academic achievement, concentration, attention and classroom participation of all children, particularly those who are hard of hearing. *Hushh-Ups* can help achieve this.

What are Hushh-Ups?

Hushh-Ups are air inflated, noise absorbing balls that are specially manufactured to be placed on the bottoms of movable chairs and tables. While these blue balls may look like tennis balls, they are much more efficient in deadening classroom noise caused by scraping chairs.

We Need Your Help!

The Canadian Hard of Hearing Association - Newfoundland and Labrador (CHHA-NL) is looking for patrons to sponsor the provision of Hushh-Ups for classrooms

Benefits to Sponsors

- Tax deductible receipt for donation
- Public Recognition of contribution
- Satisfaction of knowing the contribution made to the education of the children of Newfoundland and Labrador.

Ways You Can Help!

- Become a sponsor
- Talk to your employer about becoming a corporate sponsor
- Hold a fund-raiser (bake sale, jeans day, coffee break)
- Encourage others to become a sponsor

CHHA-NL

No donation is too small! Call CHHA-NL at 709-753-3224 to sponsor a classroom today!

Help us "Hushh-Up" the classrooms of Newfoundland and Labrador toward a "sound" future for our children.
